

GSECARS Health Guidelines

Please help us protect the health of our staff and user community by:

- Staying home or at your hotel if you are ill with symptoms like fever, cough, runny nose, etc. We'll be happy to set up remote access to beamline computers and assist with sample changes.
 - Covering coughs and sneezes.
- Wearing a mask if current CDC and/or Argonne guidelines indicate you should do so.
- Frequently washing or sanitizing hands, especially when using shared surfaces and equipment.

For additional guidance on APS policy, please visit <https://www.aps.anl.gov/Users-Information/Updates/Covid-Rule-Regulations>.

Please be advised that if you come to the beamline when you are ill we will not provide in-person support.
