EFFECTIVE JULY 17, 2023
ACCESS TO ALL APS USER PLATFORMS WILL REQUIRE AN ARGONNE DOMAIN ACCOUNT LOG-IN

This includes the following systems:

<table>
<thead>
<tr>
<th>NoMachine &amp; Globus</th>
<th>My APS User Portal</th>
</tr>
</thead>
<tbody>
<tr>
<td>User Registration</td>
<td>User Proposal System, UPS</td>
</tr>
<tr>
<td>ESAFs</td>
<td>Safety Training</td>
</tr>
</tbody>
</table>

If you let your access approval end, your domain account will be deactivated. You will need to register again before your domain account can be reactivated. See below for further details.

**User Domain Names** are initialized to badge number preceded with a lowercase letter b (e.g., b12345).

You must obtain an **initial password** from Argonne to set-up your account. For assistance, contact the ANL Service Desk at 630-252-9999, option 4 or help@anl.gov. Give the Service Desk your username (e.g., b12345) and ask them to reset your password. Note: passwords are case sensitive.

You must change your temporary password immediately. To do so, go to **Argonne Change Password**. You are not required to be connected to the Argonne network or thru Argonne VPN to change your password. Enter your Argonne Username (e.g., b12345) and temporary password (given to you by the Service Desk) into the system. Enter a **new password** of your choice, complete the authentication process, and click SUBMIT.

After your password has been successfully reset, log into https://dash.anl.gov/.
Click on **Use Light Version** link at the bottom on the page and log-in with your domain account.
After log-in, close your browser to log-off.
You will receive an email confirming your password change.
